LCD PANEL FOR A SERVER SYSTEM

Abstract of the Disclosure

A cPCI server system includes a plurality of printed circuit assemblies. A server management card coupled to the plurality of printed circuit assemblies monitors and manages operation of the server system. The server management card receives and stores status information from the plurality of printed circuit assemblies. A first LCD panel is mounted on the server system and is coupled to the server management card. The first LCD panel provides a user interface for configuring the server management card and accessing the stored status information from the server management card.
